Career Objective:

Computer Science student and aspiring Backend Engineer with hands-on experience building full-stack applications using Node.js, Express, TypeScript, React.js and Next.js. A self-motivated lifelong learner passionate about secure APIs, real-time systems, and AI-powered features. I dig deep into systems and concepts, not just surface-level code.

Skills:

Languages: JavaScript, TypeScript, Python, Go (Familiar), C++
Backend & Databases: Node.js, Express.js, MongoDB (Mongoose), PostgreSQL (Prisma), Redis, Socket.io
Frontend: React.js, Next.js, Redux, HTML5, CSS3, Tailwind CSS, Shadcn UI, DaisyUI
DevOps & Deployment: Vercel, Render, Firebase, Docker
Authentication & Payment: JWT, OAuth 2.0, Passport.js, bcrypt, RBAC, Stripe, SSLCommerz
AI-Native Development: Claude, Agentic Dev (OpenCode), ChatGPT, GitHub Copilot
Tools & Monitoring: VS Code, Git, GitHub, Postman, Selenium, Jest & Vitest, React Testing Library, Sentry, ClickUp
CS Fundamentals: RESTful API, OOP, DSA, Design Patterns, SDLC

Projects:

CareerForge (AI-Powered Youth Employment - SDG-8) Client | Server | Live

- Built a weighted job-matching engine (skills, experience, track) delivering match %, reasons, and skill-gap analysis.
- Integrated Google Gemini AI for CV skill extraction, personalized career roadmaps with PDF export, and a context-aware CareerBot assistant.
- Implemented JWT auth, Redis caching, Cloudinary uploads, Stripe/SSLCommerz payments, and an admin panel with full CRUD and SDG 8 impact analytics.

Technologies Used: TypeScript, Next.js 16, Express.js, MongoDB (Mongoose), Redis, Google Gemini API, Stripe, SSLCommerz, Cloudinary, Sentry, JWT, Tailwind CSS & shadcn/ui, React Hook Form, Zod, Recharts, next-intl

Events (Online Events & Activities Management System) Client | Server | Live

- Built a role-based event platform with authentication, host applications, and admin moderation.
- Implemented end-to-end event creation, participation, and payment tracking using PostgreSQL (Prisma), with a secure host onboarding approval workflow.
- AI-powered event recommendation system using user interests, location and participation.

Technologies Used: TypeScript, Next.js(v16), Express.js, PostgreSQL, Prisma, JWT, Stripe, Tailwind CSS & Shadcn, React Hook Form, Recharts, ZOD

Ride Booking (Online Ride Booking System) Client | Server | Live

- Implemented secure login system with JWT (access & refresh tokens) stored in cookies.
- Designed complete ride flow: request ride, driver acceptance, ride in-progress, ride completion, and cancellation and integrated SSLCommerz payment gateway with server-side verification.
- Developed Emergency Safety Contacts feature where riders can add/update contacts.

Technologies Used: React.js, Redux Toolkit / RTK Query, React Hook Form, Express.js, MongoDB(Mongoose), JWT, OAuth 2.0 with Passport.js, bcrypt.js, Axios, SSLCommerz, Tailwind CSS & Shadcn, ZOD

Courseworks & Activities:

- 100 Days of Python - Udemy View Certificate
- Next Level Web Development - Programming Hero View Certificate
- Complete Web Development Course - Programming Hero View Certificate
- Microsoft Excel - 10 Minute School View Certificate
- **Round 2 Qualifier,** SOLVIO AI Hackathon 2025 View Certificate
- **Participant,** NextGen Hackathon (IIUC) 2025

Education:

National Institute of Textile Engineering and Research (University of Dhaka) Savar, Dhaka
B.Sc. in Computer Science and Engineering CGPA: 3.33/4 (Expected)
