Abdullah Al Towsif

Full Stack Developer

+8801641413635 | abdullah.al.towsif2002@gmail.com | LinkedIn | GitHub | Dhaka, Bangladesh

Career Objective:

Highly passionate and confident Computer Science and Engineering student, with a strong foundation in programming and web development. Dedicated to continuous learning and problem-solving. Committed to achieving my dream of becoming a successful Software Engineer by growing in coding and problem-solving.

Skills:

Languages: JavaScript, TypeScript, Python, Go (Familiar), C++
Frontend: React.js, Next.js, Redux, Zustand (Familiar), HTML5, CSS3, Tailwind CSS, Shadcn, DaisyUI
Backend & Database: Node.js, Express.js, Django (Familiar), MongoDB (Mongoose), PostgreSQL (Prisma), SQLite, Redis (Familiar)
DevOps & Deployment: Vercel, Render, Firebase, Docker (Familiar)
Tools: VS Code, Git, GitHub, Postman, Selenium, Sentry (Familiar)
CS Fundamentals: Object-Oriented Programming, Data Structures & Algorithms, Design Patterns

Projects:

Events (Online Events & Activities Management System) Client | Server | Live

- Developed a role-based event management platform with secure authentication, host applications, and admin moderation.
- Implemented end-to-end event creation, participation and payment tracking using PostgreSQL(Prisma).
- Designed a secure, transactional approval workflow for host onboarding.
- AI-powered event recommendation system using user interests, location and participation.

Technologies Used: TypeScript, Next.js(v16), Express.js, PostgreSQL, Prisma, JWT, Stripe, Tailwind CSS & Shadcn, React Hook Form, Recharts, ZOD

Ride Booking (Online Ride Booking System) Client | Server | Live

- Implemented secure login system with JWT (access & refresh tokens) stored in cookies.
- Designed complete ride flow: request ride, driver acceptance, ride in-progress, ride completion, and cancellation.
- Developed Emergency Safety Contacts feature where riders can add/update contacts.

Technologies Used: React.js, Redux Toolkit / RTK Query, React Hook Form, Express.js, MongoDB(Mongoose), JWT, OAuth 2.0 with Passport.js, bcrypt.js, Axios, Tailwind CSS & Shadcn, ZOD

EduHive (Online Education System) Client | Server | Live

- Role-Based Dashboard & Access Control (Admin, Teacher, Student)
- End-to-End Class Management with Payment Integration
- Feedback System with Teaching Evaluation Reports (TER)

Technologies Used: React.js, Express.js, MongoDB, JWT, Firebase, Stripe, TanStack Query, Axios, Tailwind CSS & Daisy UI, React Hook Form, Recharts

Courseworks & Activities:

- 100 Days of Python — View Certificate
- Next Level Web Development — View Certificate
- Complete Web Development Course — View Certificate
- Microsoft Excel — View Certificate
- **Round 2 Qualifier,** SOLVIO AI Hackathon 2025 — View Certificate
- **Participant,** NextGen Hackathon (IIUC) 2025

Education:

National Institute of Textile Engineering and Research (University of Dhaka) Savar, Dhaka

B.Sc. in Computer Science and Engineering Final Semester (Final Exam Remaining)
